

Repubblica di S. Marino - Seconda e Terra Torre

San Marino. 20.5.59.

We have come here this afternoon by
Coach, a tremendous climb 2,500
feet up but very interesting. The
oldest republic in the world dating
from 301 A.D. The Hall of Deputies
and the Cathedral have some lovely
paintings. This morning we
lazed on the sands and I bathed,
the water was the warmest I have
so far experienced, very clear and
the sea like a mill pond. There
are literally miles of sandy beaches
at Rimini and all the way along the
coast and the water is very shallow.

S. A. Poligrafica Sammarinese

The views from San Marino are
glorious a wonderful panorama over
the Apennines. Will write you again
tomorrow from Ravenna Much love both.
