Correspondence

Friday 4 June 1976

My dear Mum & Dad,

After leaving March yesterday morning, we cycled

through the fens to Spalding, where we lunched in a thirteenth century 'home-made' type of café. Then on to Grantham, leaving left the flat landscape, passing through gently undulating countryside, well wooded & with stone-built villages. We stayed at the Youth Hostel, where there were some nice overseas students. To-day we reached Lincoln at lunchtime, spent 2 hours looking round the Castle & Cathedral, going up the steeply cobbled streets, like a mixture of Chocerry, Rye & St Michael's Mount! Now to Gainsborough. Then love William & Joan

Picture — North West Front of the Cathedral.

LINCOLN MINSTER

A TOURISTS' GUIDE

Of the Norman Cathedral, completed in 1092, only the west front and the lower part of the west towers remain. Most of the present building was erected between 1192 and 1280 and owes its inspiration, as the first Gothic church in Britain, to the great St. Hugh. It is famous for its commanding position and great wealth of superb carving in wood and stone.
